

# SNX2 – Top 10 Enrichments – WikiPathways

Description

Synaptic vesicle pathway

Clock-controlled autophagy in bone metabolism

EGF/EGFR signaling pathway

Ebola virus infection in host

Autophagy

Neurodegeneration with brain iron accumulation (NBIA) subtypes pathway

Nanoparticle triggered autophagic cell death

Host-pathogen interaction of human coronaviruses – autophagy

Glucuronidation

Fatty Acids and Lipoproteins Transport in Hepatocytes
