

# DUOX1 – Top 10 Enrichments – SMART

Description

Intercrine alpha family (small cytokine C–X–C) (chemokine CXC).

Von Willebrand factor (vWF) type C domain

STAT protein, protein interaction domain

Basic region leucin zipper

Serine/Threonine protein kinases, catalytic domain

Src homology 2 domains

Toll – interleukin 1 – resistance

Tyrosine kinase, catalytic domain

Acidic and basic fibroblast growth factor family.

EF-hand, calcium binding motif
