

TUBGCP2 – Top 10 Enrichments – KEGG

Description

Progesterone-mediated oocyte maturation

Pathogenic Escherichia coli infection

Alzheimer disease

Oocyte meiosis

Phagosome

Huntington disease

Parkinson disease

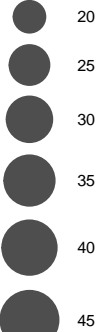

Cell cycle

Gap junction

Amyotrophic lateral sclerosis

FDR ($-\log_{10}$)

Gene count

P-value

1e-10 1e-09 1e-08 1e-07 1e-06
